Cactus Imaging is pleased to announce that its state of the art HP XP2700 UV Printer is now commissioned and fully operational.

Despite the challenging economic conditions, Cactus Imaging continues to reach new heights. Once again it has demonstrated its leadership by delivering its clients improved quality and service through a commitment to investing in the very best technology.

The highly anticipated XP2700 is able to print on a wide range of substrates including double sided backlits. Its superior image quality produces vivid colours with an exceptionally wide colour gamut and makes it perfect for producing internal retail displays, hanging banners and posters.

The XP2700 also uses environmentally friendly UV ink which supports Cactus Imaging's philosophy on choosing sustainable alternatives where possible.

To experience the quality of the XP2700 please contact Cactus Imaging's Sydney office on 02 9748 8733 or Melbourne on 03 9281 3883.
