LIGARE INSTALLS NEW OCE DIGITAL PRESS

Ligare is excited to announce the installation of a new Océ 6250 into its Digital Print Facility this week.

The Océ 6250 is one of the fastest high speed perfecting digital printers in the world, and is the first system to offer simultaneous double-sided digital printing. It brings unsurpassed speed, productivity and offset printer quality to Ligare's Riverwood printing operation.

The new 6250 will complement Ligare's current 6250, and comes with the addition of two extra paper in-feed units. The installation means Ligare now has an impressive arsenal of Océ equipment in its innovative Digital Print Facility, including two 6250 sheet printers, a 7450 digital web, and two 620/ 900 colour printers.

The new machine provides significant benefits to Ligare. "For the customer, the 6250 means faster turnaround and competitive pricing. Internally, the 6250 provides a much more efficient and cost effective workflow for our digital department" said Ligare's General Manager, Wayne Bywater.

Océ is Ligare's manufacturer of choice for high quality digital printing equipment. "We find Océ to provide the best support and most economical solutions for our needs and we are committed to our ongoing partnership" Bywater said.

The new machine strengthens Ligare's leadership position within the local Australasian digital printing market. "As the printing industry evolves, our customers continue to require faster speed at a competitive price, without compromising on quality. We will continue to boost our digital print capability and extend our digital leadership to ensure our customers are rewarded with the best service, speed and quality" Bywater said.
